Travel Agency Website — DESIGN.md

Version: 1.0
Design Status: Production Design Specification
Primary Reference: Travel Tracker BD
Brand Style: Premium Travel / Modern Corporate / Elegant
Primary Color: Navy Blue
Accent: Golden
Secondary: Dark Grey
Typography: Poppins + Hind Siliguri
Design Approach: Mobile-first, responsive, performance-first, SEO-first

---

1. Design Philosophy

The website should communicate three things within the first few seconds:

> **Trust + Travel + Professional Expertise**

The design should feel premium without becoming visually heavy.

The visual hierarchy should follow:

```
BRAND
  ↓
DESTINATION
  ↓
SERVICE
  ↓
PACKAGE
  ↓
INFORMATION
  ↓
ACTION
```

The design must prioritize conversion over decoration.

---

2. Primary Visual Direction

Design Keywords

```
Premium
Elegant
```

```
Trustworthy
Modern
International
Clean
Travel-focused
Professional
Warm
Confident
```

Avoid

```
Cheap-looking travel templates
Overloaded sliders
Excessive glassmorphism
Excessive gradients
Too many colors
Huge decorative animations
Over-rounded cards
Cluttered layouts
Tiny text
Low-quality stock imagery
```

---

3. Brand Color System

Primary — Navy Blue

```
Primary Navy:
#071A35
```

Use for:

- Header
- Hero overlays
- Dark sections
- Footer
- Primary text
- Primary buttons
- Navigation

Deep Navy

```
#041226
```

Use for:

- Footer
- Dark CTA sections
- Strong contrast backgrounds

Golden Accent

```
#D4AF37
```

Use for:

- Primary accent
- Icons
- CTA highlights
- Active states
- Small borders
- Premium labels
- Decorative details

Light Gold

```
#E8D28A
```

Use sparingly for:

- Hover states
- Subtle backgrounds
- Decorative elements

Dark Grey

```
#252A31
```

Use for:

- Secondary text
- Dark cards
- Supporting UI

Body Background

```
#F8F9FB
```

White

```
#FFFFFF
```

Use for:

- Cards
- Navigation
- Content areas
- Forms

---

4. Color Usage Ratio

Recommended approximate visual balance:

```
Navy        35%
White       40%
Light Gray  15%
Golden       8%
Dark Grey    2%
```

Golden must remain an accent.

Do not make the website predominantly gold.

---

5. Typography

English

Primary:

```
Poppins
```

Fallback:

```
Inter, Arial, sans-serif
```

Bengali

Primary:

```
Hind Siliguri
```

---

6. Typography Scale

Desktop

```
Display:
64px / 1.05 / 700

H1:
52px / 1.1 / 700

H2:
40px / 1.15 / 700

H3:
28px / 1.2 / 600

H4:
22px / 1.3 / 600

Body Large:
18px / 1.6 / 400

Body:
16px / 1.6 / 400

Small:
14px / 1.5 / 400

Caption:
12px / 1.4 / 500
```

---

7. Mobile Typography

```
Display:
38px

H1:
34px

H2:
28px

H3:
22px

H4:
18px

Body Large:
17px

Body:
15px

Small:
13px

Caption:
11px
```

Avoid extremely large typography on small screens.

---

8. Font Weight

```
400 — Regular
500 — Medium
600 — Semi Bold
700 — Bold
```

Use 700 selectively.

---

9. Layout System

Use a consistent max-width container.

Desktop:

```
max-width: 1280px
```

Large desktop:

```
max-width: 1440px
```

Mobile:

```
padding: 20px
```

Tablet:

```
padding: 32px
```

Desktop:

```
padding: 48px
```

---

10. Grid System

Desktop

12-column grid.

```
12 columns
24px gap
```

Tablet

8-column grid.

Mobile

4-column conceptual grid.

Most mobile sections should use a single-column layout.

---

11. Spacing System

Use a consistent 8px-based spacing system.

```
4px
8px
12px
16px
24px
32px
40px
48px
64px
80px
96px
120px
```

Section spacing:

Desktop:

```
80–120px
```

Tablet:

```
64–80px
```

Mobile:

```
48–64px
```

---

12. Border Radius

Use moderate rounding.

```
Small:
8px

Medium:
12px

Large:
```

```
16px

Hero / Feature:
20px
```

Avoid excessive 32–50px rounded cards.

---

13. Shadows

Use subtle shadows only.

Example conceptual levels:

```
Shadow Small:
0 4px 15px rgba(0,0,0,0.06)

Shadow Medium:
0 10px 30px rgba(0,0,0,0.08)
```

Do not make every element floating.

---

14. Borders

Default:

```
1px solid #E5E7EB
```

Premium accent:

```
1px solid Golden
```

Golden borders should be used sparingly.

---

15. Navigation Design

Desktop

Top utility bar:

```
-----------------------------------------------------
Call | WhatsApp | Email                    Language
-----------------------------------------------------
```

Main navigation:

```
LOGO

Home
About
Tours
Visa
Air Ticketing
Gallery
Blog
Contact

                  [ Get Started ]
```

---

16. Header Behavior

Desktop:

- Sticky header
- Slight shadow after scroll
- Navy or white surface depending on hero treatment

Hero-overlap version:

```
Transparent Navbar
        ↓
Scroll
        ↓
Solid Navy Navbar
```

If implemented, transition must be lightweight.

---

17. Mobile Header

```
┌──────────────────────────────┐
| LOGO                    ☰    |
└──────────────────────────────┘
```

Menu opens as:

```
Home
About Us
Tour Packages
Visa Services
Air Ticketing
Destinations
Gallery
Blog
FAQ
Contact
```

Primary CTA:

```
[ Get Started ]
```

---

18. Hero Design

Hero is the visual signature of the website.

Use a large cinematic travel image.

Recommended:

```
Full width
Minimum height: 650px desktop
Minimum height: 600px tablet
Minimum height: 620px mobile
```

Do not use a heavy image carousel.

Prefer one strong hero image or very limited rotation.

---

19. Hero Overlay

Use navy overlay:

```
Image
+
Dark Navy Gradient
```

```
+
Content
```

Text should remain highly readable.

Golden accent can highlight one phrase.

Example:

> Explore the World.
> **Travel With Confidence.**

---

20. Hero Content Alignment

Desktop:

```
Left aligned
Maximum content width: 600px
```

Mobile:

```
Left aligned
Full width
```

Avoid center alignment unless the selected reference composition strongly requires it.

---

21. Hero Search

Search component:

```
┌──────────────────────────────────────────┐
│ 🔍 Where do you want to go?              │
│                                          │
│ Thailand     Maldives     Dubai     Bali │
└──────────────────────────────────────────┘
```

Desktop search may sit beneath the hero copy.

Mobile search becomes full width.

---

22. Primary Button

Default:

```
Background: Navy
Text: White
Border: None
Radius: 10–12px
Height: 48–52px
Padding: 0 24px
```

Hover:

```
Background → Darker Navy
```

---

23. Golden CTA Button

For high-priority conversion:

```
Background: Golden
Text: Navy
```

Use for:

- Get Started
- Apply Now
- Request Fare
- Plan My Trip

Do not make every button gold.

---

24. Secondary Button

```
Background: Transparent
Border: 1px solid Navy
Text: Navy
```

On dark backgrounds:

```
Border: White
Text: White
```

---

25. Service Cards

Three primary cards:

```
┌──────────────────────────┐
│ ✈                        │
│ Air Ticketing            │
│                          │
│ Domestic & worldwide     │
│ airfare assistance       │
│                          │
│ Request Fare →           │
└──────────────────────────┘
```

Cards should be clean and compact.

---

26. Service Card Hover

Desktop:

```
Translate Y:
-4px

Shadow:
Increase slightly

Icon:
Golden highlight
```

Avoid exaggerated 3D animation.

---

27. Featured Tour Card

Structure:

```
┌──────────────────────────────┐
│                              │
```

---

28. Tour Image Ratio

Recommended:

```
4:3
```

or:

```
16:10
```

Avoid overly tall images that consume excessive vertical space.

---

29. Destination Card

Use image-first cards.

Text should sit over a subtle dark gradient or beneath the image.

---

30. Popular Destination Section

Desktop:

```
Featured large destination
+
4–6 smaller destinations
```

Alternative:

```
4-column grid
```

Mobile:

```
Horizontal scroll
```

Do not create an enormous vertical list.

---

31. Visa Card

```
┌──────────────────────────┐
│ 🇹🇭                      │
│ Thailand Visa            │
│                          │
│ Tourist / E-Visa         │
│                          │
│ View Requirements →      │
└──────────────────────────┘
```

Use small country flags carefully.

Do not rely on emoji flags as the only visual representation.

---

32. Visa Page Header

Hero:

```
VISA SERVICES

Professional assistance for
```

```
your next international journey.

[ Search Visa Country ]
```

Use a dark navy section with subtle travel imagery.

---

33. Visa Country Page

Top:

```
Thailand Tourist Visa

Processing Time*
Starting Fee*
Visa Type

[ Apply Now ]
```

Then:

```
Overview
Required Documents
Eligibility
Profession-based Checklist
Application Process
Fees
Important Notes
FAQ
```

---

34. Visa Requirements UI

Use checklist cards:

```
✓ Valid Passport
✓ Recent Photograph
✓ Bank Statement
✓ Employment Certificate
✓ Travel Itinerary
```

Avoid dense paragraphs.

---

35. Profession Selector

Interactive segmented cards:

```
┌──────────────┐ ┌──────────────┐
│ Salaried     │ │ Business     │
└──────────────┘ └──────────────┘

┌──────────────┐ ┌──────────────┐
│ Student      │ │ Freelancer   │
└──────────────┘ └──────────────┘
```

Selected state:

```
Navy background
Golden border
White text
```

---

36. Visa Application Form

Use a multi-step UI.

```
01 Applicant
──────●──────────
02 Travel
03 Documents
04 Review
05 Submit
```

On mobile, show:

```
Step 1 of 5
```

instead of a wide horizontal timeline.

---

37. Document Upload UI

```
┌──────────────────────────────┐
│ Upload Passport              │
│                              │
```

```
│      ↑ Drag & Drop              │
│      or Browse Files            │
│                                 │
│ JPG / PNG / PDF                 │
└─────────────────────────────────┘
```

Show:

- filename
- file size
- upload status
- remove action

Never display sensitive documents publicly.

---

38. Tour Listing Page

Header:

```
Explore Our Tour Packages

Find a journey that fits your plans.
```

Desktop:

```
┌──────────────┬──────────────────────────────┐
│ FILTERS      │ TOUR GRID                    │
│              │                              │
│ Destination  │ [Card] [Card] [Card]         │
│ Tour Type    │ [Card] [Card] [Card]         │
│ Duration     │                              │
│ Budget       │                              │
└──────────────┴──────────────────────────────┘
```

Mobile:

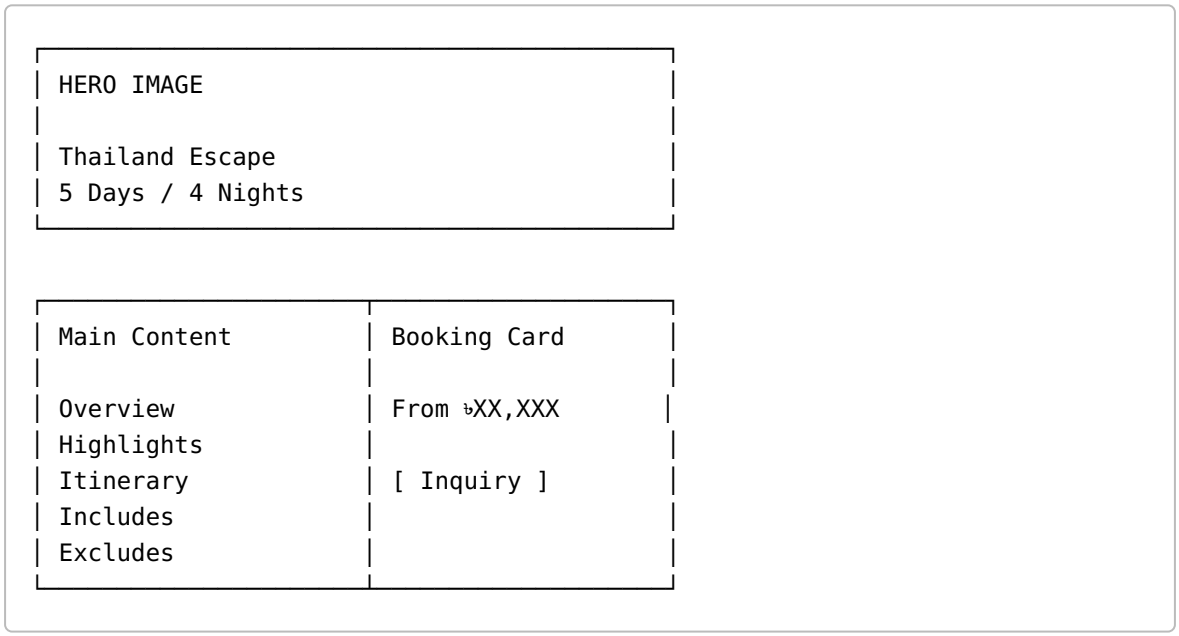

```
[ Filters ] [ Sort ]

Cards
Cards
Cards
```

---

39. Tour Detail Layout

Desktop:

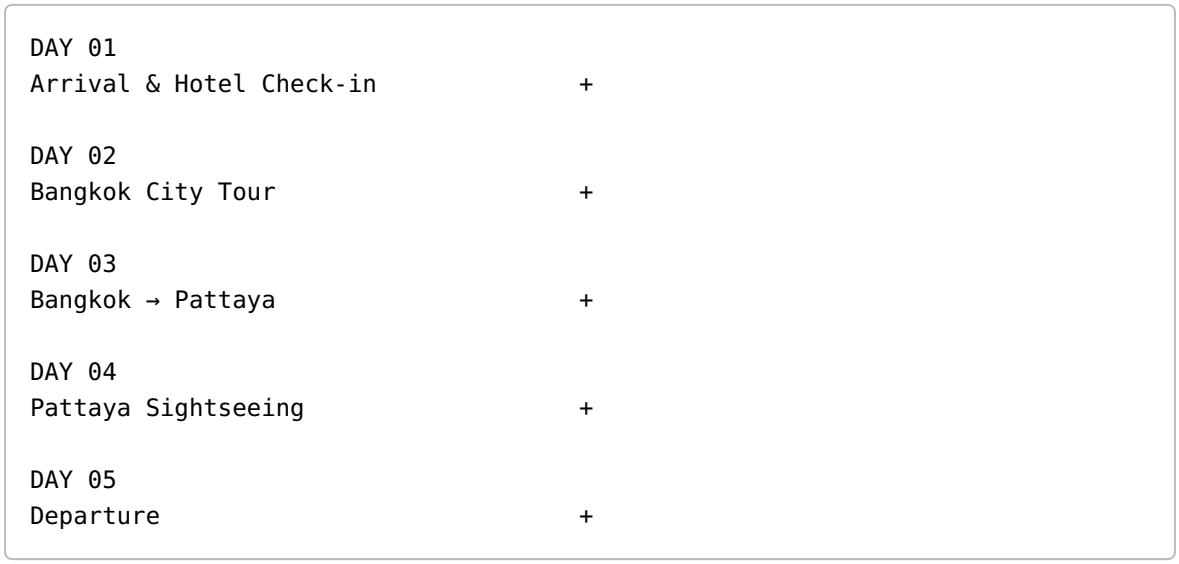

The booking/inquiry card may become sticky on desktop.

---

40. Itinerary Design

Accordion:

Expanded state reveals detailed information.

---

41. Package Includes / Excludes

Two visually distinct columns:

```
INCLUDES
✓ Hotel
✓ Breakfast
✓ Transfer
✓ Sightseeing
```

```
EXCLUDES
× Personal expenses
× Travel insurance
× Optional activities
```

Use iconography rather than heavy colors.

---

42. Customized Tour Section

Large dark section:

```
YOUR TRIP.
YOUR WAY.

Can't find the perfect package?

Tell us what you need and we'll
help plan your trip.

[ Plan My Trip ]
```

Use destination image on one side.

---

43. How It Works

Four horizontal steps on desktop:

```
01              02              03              04

Consult         Plan            Confirm         Travel
```

Mobile:

```
01 Consultation
      ↓
02 Planning
      ↓
03 Confirmation
      ↓
04 Travel
```

---

44. Trust Section

Use clean icon cards:

```
✓
Transparent Pricing

✓
Professional Assistance

✓
Secure Documentation

✓
Dedicated Support
```

No excessive decorative graphics.

---

45. Testimonials

Desktop:

```
          ★★★★★

“Professional support throughout
our entire trip.”

Customer Name
Thailand Trip
Verified Client
```

Use 2–3 cards visible at once.

Mobile:

One card at a time.

---

46. Testimonial Source Badge

If verified:

```
Google Review
Facebook Review
Website Review
```

Do not fabricate source labels.

---

47. Blog Card

```
┌──────────────────────────┐
│      FEATURE IMAGE       │
├──────────────────────────┤
│ VISA GUIDE               │
│                          │
│ Thailand Visa Guide      │
│ for Bangladeshi          │
│ Travelers                │
│                          │
│ Read Article →           │
└──────────────────────────┘
```

Show:

- Category
- Title
- Date
- Read action

---

48. FAQ Design

Accordion:

```
What documents do I need for a visa?       +
```

```
How long does visa processing take?        +

Can I customize a tour package?             +

How can I request an air ticket?            +
```

Only one or multiple items may be expanded depending on UX preference.

---

49. Final CTA

Dark Navy background.

```
READY TO PLAN YOUR
NEXT JOURNEY?

Tell us where you want to go.

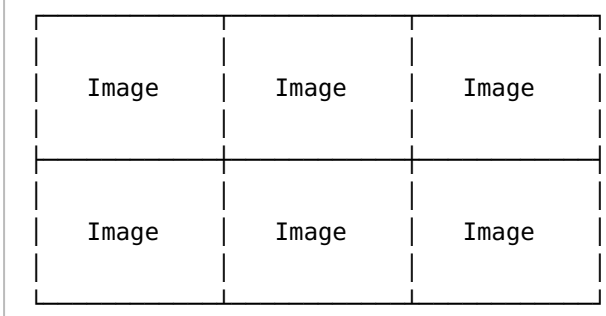

[ Explore Tours ]
[ Contact Us ]
```

Golden decorative line or icon.

---

50. Gallery Design

Desktop:

Mobile:

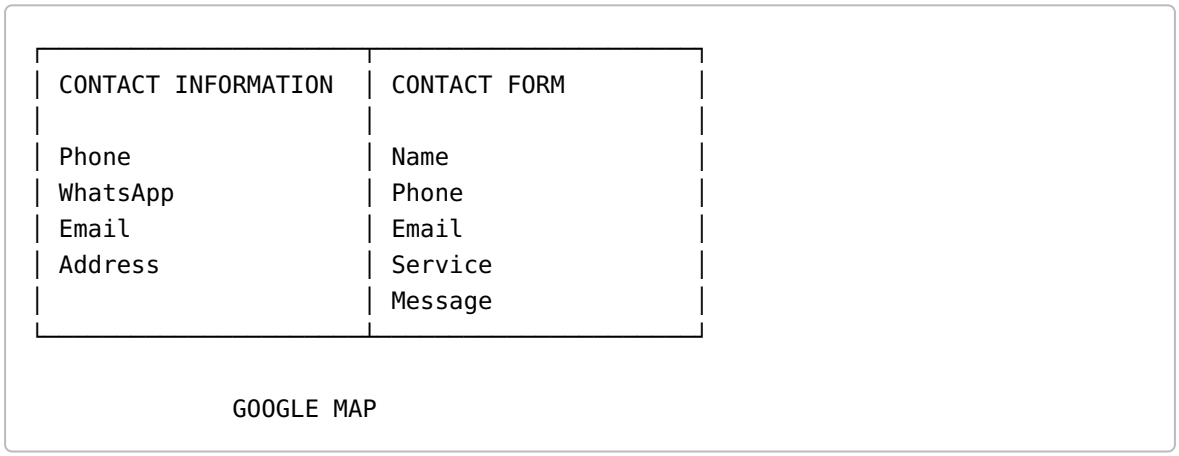

```
2-column grid
```

Use optimized images.

---

51. Contact Page

Desktop:

Mobile becomes stacked.

---

52. Floating Contact Controls

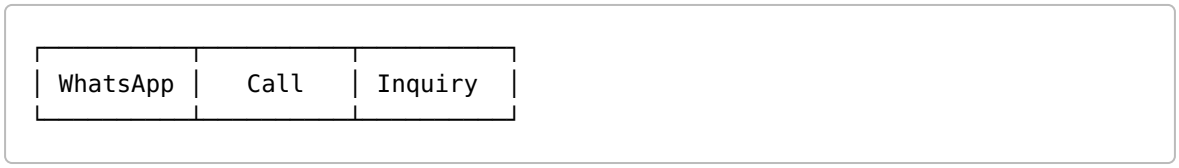

Desktop:

Small floating:

Mobile:

Fixed bottom:

Ensure it does not cover form controls.

---

53. Footer

Dark Navy footer.

Four columns:

```
COMPANY
About
Why Us
Contact
Gallery

SERVICES
Tours
Visa
Air Ticketing
Customized Tours

DESTINATIONS
Thailand
Maldives
Dubai
Singapore
Malaysia

RESOURCES
Blog
Travel Guide
Visa Guide
FAQ
```

Bottom:

```
Privacy
Terms
Refund Policy
Visa Disclaimer

© 2026 Brand Name
```

---

54. Mobile Footer

Accordion-style groups may be used:

```
Company +
Services +
Destinations +
Resources +
```

Contact information remains visible.

---

55. Form Design

Inputs:

```
Height: 48–52px
Radius: 10px
Border: #D9DEE7
Background: White
```

Focus:

```
Border: Navy
Outline: subtle Golden
```

Labels must always be visible.

Do not rely only on placeholders.

---

56. Form Error State

Example:

```
Phone Number

[ 017XXXXXXXX ]

Please enter a valid phone number.
```

Error message should be directly connected to the relevant field.

---

57. Success State

After inquiry:

```
✓

Your inquiry has been submitted.

Reference:
INQ-2026-001245
```

```
Our team will contact you shortly.

[ Back to Home ]
```

---

58. Empty State

Tour search with no results:

```
No packages found.

Try changing your destination,
budget or travel type.

[ Reset Filters ]
```

---

59. Loading State

Use skeletons:

```
████████████
███████

██████████
```

Avoid full-page spinners unless absolutely necessary.

---

60. Desktop Responsive Behavior

At ≥1280px:

- Full navigation
- 3–4 column cards
- Large hero
- Wide content container
- Side inquiry cards
- Full footer columns

At 1440px+:

- Increase whitespace
- Do not stretch text lines excessively

- Keep content max-width around 1280–1440px

---

61. Tablet Responsive Behavior

At approximately 768–1024px:

- Navigation may collapse
- 2-column cards
- Hero height reduced
- Filters become drawer
- Side-by-side sections may stack

---

62. Mobile Responsive Behavior

At <768px:

- Single-column content
- 2-column small grids where appropriate
- Horizontal scrolling destination cards
- Collapsible filters
- Accordion itinerary
- Sticky contact CTA
- Simplified navigation
- Shorter forms

---

63. Breakpoint Strategy

Recommended:

```
xs: 320px
sm: 480px
md: 768px
lg: 1024px
xl: 1280px
2xl: 1440px
```

Use CSS behavior rather than designing around specific devices only.

---

64. Accessibility

All components must support:

- Keyboard navigation
- Visible focus
- Proper labels
- Semantic HTML
- Accessible color contrast
- Screen-reader-friendly buttons
- Alt text
- Accessible accordion
- Accessible modal
- Error announcements

---

65. Iconography

Use a single consistent icon library.

Preferred style:

```
Minimal
Rounded
Modern
2px visual weight
```

Icons should support:

- Travel
- Visa
- Ticket
- Location
- Calendar
- Users
- Phone
- WhatsApp
- Email
- Search
- Arrow
- Check
- Close

Do not mix five different icon styles.

---

66. Photography Direction

Photography should feel:

```
Cinematic
Bright
Authentic
Premium
Destination-focused
Human
```

Preferred subjects:

- Destinations
- Travelers
- Families
- Couples
- Airports
- Hotels
- Cultural experiences
- Scenic locations

Avoid obviously artificial stock imagery wherever possible.

---

67. Image Treatment

Use:

- High-quality source images
- Proper cropping
- Consistent aspect ratios
- Subtle gradients for text overlays
- WebP/AVIF
- Responsive image sizes

Do not distort images.

---

68. Golden Accent Rules

Golden should highlight:

```
Important words
CTA
Icons
```

```
Badges
Small borders
Active navigation
Decorative lines
```

Golden should NOT dominate:

```
Large text blocks
Entire cards
Full-page backgrounds
Every button
Every icon
```

---

69. Premium Decorative System

Use subtle:

```
Golden line
Small compass icon
Location pin
Flight path
Abstract travel contour
```

These can appear as background decorations.

Opacity should remain low.

---

70. Section Heading Pattern

Standard:

```
SMALL GOLD LABEL

Featured Tour Packages

Discover journeys designed
for your next adventure.
```

Example:

```
FEATURED TOURS
Explore Our Most Popular Journeys
```

The small eyebrow label should use uppercase English or appropriate Bengali text.

---

71. Card Design System

All cards should share:

```
Radius
Shadow
Border
Padding
Typography
CTA behavior
```

Avoid each section having a completely different card style.

---

72. CTA Hierarchy

Priority:

```
Primary:
Get Started / Inquiry / Apply Now

Secondary:
Explore / View Details

Tertiary:
Learn More
```

Each section should have one obvious primary action.

---

73. Microinteractions

Use subtle interaction:

```
Button:
100–180ms
```

```
Card:
180–250ms

Accordion:
200–300ms

Navigation:
150–200ms
```

Use CSS transitions where possible.

Avoid unnecessary JavaScript animation libraries.

---

74. Scroll Behavior

Smooth scrolling can be used for:

- Anchor navigation
- Section jumps

Do not hijack normal browser scrolling.

---

75. Accessibility Motion

Respect:

```
prefers-reduced-motion
```

When enabled:

- Disable non-essential animation
- Reduce transitions
- Avoid parallax

---

76. Performance-Oriented Design

Design decisions must support performance.

Avoid:

- Background video by default
- Huge hero videos
- Heavy animation libraries

- Multiple external fonts
- Auto-playing media
- Large uncompressed images
- Excessive carousels

---

77. Image Loading Strategy

Hero:

```
High priority
```

Above-the-fold images:

```
Eager / prioritized where appropriate
```

Below-the-fold:

```
Lazy
```

Gallery:

```
Lazy
```

---

78. Component Naming

Use predictable naming.

Examples:

```
Navbar
HeroSection
ServiceCard
TourCard
DestinationCard
VisaCard
OfferCard
TestimonialCard
BlogCard
FAQAccordion
InquiryForm
VisaApplicationForm
```

```
GalleryGrid
Footer
```

---

79. Public Page Layout Template

Every major page should follow:

```
Header
↓
Page Hero
↓
Breadcrumb
↓
Main Content
↓
Supporting Content
↓
CTA
↓
Footer
```

Do not force this exact structure where it harms UX.

---

80. Breadcrumb Design

Example:

```
Home
/
Tour Packages
/
Thailand Escape
```

Desktop:

Inline.

Mobile:

Compact and horizontally scrollable if necessary.

---

81. SEO-Friendly Visual Hierarchy

Every page must have:

```
One H1
↓
H2 sections
↓
H3 subsections
```

Do not use headings solely for visual styling.

---

82. Admin Design Direction

The admin dashboard should NOT look identical to the public website.

Public:

```
Premium Travel
```

Admin:

```
Clean SaaS Dashboard
```

Use:

- Sidebar
- Topbar
- Data tables
- Filters
- Forms
- Status badges
- Charts
- Modals

---

83. Admin Color System

Primary:

```
Navy
```

Accent:

```
Golden
```

Background:

```
#F5F7FA
```

Cards:

```
White
```

Status colors should remain semantic:

```
Success
Warning
Error
Info
```

Do not use gold for every status.

---

84. Admin Sidebar

```
Dashboard

Travel
  Tours
  Destinations

Visa
  Countries
  Visa Types
  Applications

Requests
  Tour Inquiries
  Ticket Requests
  Contact Messages

Content
  Blog
  Gallery
  Testimonials
```

```
  FAQ
  Offers

Website
  Pages
  Homepage
  SEO
  Media

System
  Users
  Roles
  Settings
  Activity Logs
```

---

85. Admin Data Table

Columns should remain practical.

Example:

```
Tour
Destination
Price
Status
Featured
Updated
Actions
```

Actions:

```
View
Edit
Duplicate
Delete
```

Delete requires confirmation.

---

86. Admin Status Badges

Examples:

```
Published
Draft
Active
Inactive
Pending
Processing
Completed
Cancelled
```

Use compact pill badges.

---

87. Admin Forms

Large forms should use sections:

```
Basic Information
Pricing
Itinerary
Inclusions
Exclusions
Media
SEO
Publishing
```

Use sticky save controls on long pages if useful.

---

```

---

90. Homepage Editor

Drag-and-drop ordering is optional.

Minimum:

```
Enable
Disable
Order
Edit Content
Select Items
```

Sections:

```
Hero
Services
Featured Tours
```

```
Destinations
Visa
Offers
Why Us
Process
Testimonials
Blog
FAQ
CTA
```

---

91. Dark Mode

Public website:

Not required for MVP.

The premium Navy + Gold system already provides a strong dark visual language.

Admin dashboard:

Optional.

---

92. Localization

Architecture should be future-ready for:

```
English
Bengali
```

MVP can launch with one primary language, but database/content architecture should not prevent multilingual expansion.

---

93. Currency

Primary:

```
BDT (৳)
```

Architecture should be ready for:

```
USD
EUR
GBP
AED
```

Future implementation.

---

94. Content Tone

Public website copy should be:

```
Clear
Professional
Warm
Confident
Concise
Customer-focused
```

Avoid:

```
Overpromising
Fake urgency
Guaranteed visa language
Unverified claims
Excessive marketing clichés
```

---

95. Photography + Copy Balance

Do not allow imagery to overwhelm information.

Recommended:

```
40% Visual
60% Information / whitespace
```

For hero:

```
60% Visual
40% Content
```

For destination cards:

```
70% Visual
30% Text
```

---

96. Mobile Content Priority

On mobile prioritize:

```
1. Brand
2. Page title
3. Primary action
4. Core information
5. Supporting information
6. Secondary links
```

Long information should become:

- Accordion
- Tabs
- Collapsible sections

where appropriate.

---

97. Mobile Tour Card

```
┌──────────────────────────┐
│       IMAGE              │
├──────────────────────────┤
│ Thailand Escape          │
│ 5D / 4N                  │
│                          │
│ From ৳XX,XXX             │
│                          │
│ [ View Details ]         │
└──────────────────────────┘
```

---

98. Mobile Visa Card

```
┌──────────────────────┐
│ 🇹🇭 Thailand          │
│ Tourist Visa         │
│                      │
│ Processing: X days   │
│                      │
│ View Details →       │
└──────────────────────┘
```

---

99. Mobile Inquiry UX

Forms should be short.

First ask:

```
What do you need?
```

Then dynamically reveal:

```
Tour
Visa
Air Ticket
Custom Trip
```

This reduces cognitive load.

---

100. Conversion Principle

Every major page must answer:

What is this?

Why should I care?

What should I do next?

The UI should make the answer visually obvious.

---

101. Design Quality Checklist

Visual

- [ ] Navy + Gold identity consistent
- [ ] Typography consistent
- [ ] Spacing consistent
- [ ] Cards consistent
- [ ] Buttons consistent
- [ ] Image ratios consistent
- [ ] No unnecessary visual clutter

UX

- [ ] Clear navigation
- [ ] Clear CTAs
- [ ] Short inquiry flows
- [ ] Mobile-friendly
- [ ] Useful filtering
- [ ] Clear information hierarchy

Accessibility

- [ ] Contrast checked
- [ ] Keyboard navigation
- [ ] Labels
- [ ] Focus states
- [ ] Alt text
- [ ] Reduced motion

Performance

- [ ] Optimized images
- [ ] Minimal animation
- [ ] Minimal JS
- [ ] Lazy loading
- [ ] Responsive images
- [ ] No unnecessary third-party resources

---

102. Final Design System Summary

```
BRAND
Navy + Golden

TYPOGRAPHY
Poppins + Hind Siliguri
```

```
STYLE
Premium + Clean + Corporate Travel

LAYOUT
12-column desktop
8-column tablet
4-column mobile concept

CARDS
12–16px radius

BUTTONS
48–52px height

SECTIONS
48–120px spacing

IMAGERY
Cinematic + Destination-focused

ANIMATION
Subtle + Performance-friendly

NAVIGATION
Simple + Conversion-focused

MOBILE
First-class experience

ADMIN
Clean SaaS dashboard

SEO
Semantic + Content-first
```

---

103. Final Design Principle

The website should look like a brand that says:

> **“We know travel, we respect your time, and we make the complicated parts easier.”**

It should NOT look like:

> “Here are 50 random tour packages. Please call us.”

The final experience should be:

```
DISCOVER
    ↓
TRUST
    ↓
EXPLORE
    ↓
UNDERSTAND
    ↓
INQUIRE
    ↓
CONVERT
```
